Alone in Saw-mill at Midnight,
unmindful of dampness, drafts, storms or cold, W. J. Atkins worked as night watchman at Banner Springs, Tenn. Such exposure gave him a severe cold that settled on his lungs. At last he had to give up work. He tried many remedies, but all failed till he used Dr. King's New Discovery. "After using one bottle," he writes, "I went back to work as well as ever." Severe colds, stubborn coughs, inflamed throats and sore lungs, hemorrhages, croup and whooping cough get quick relief and prompt cure from this glorious medicine. 50c and \$1.00. Trial bottle free, guaranteed by the Red Cross Pharmacy.

The Modern Cleanser.
Soap in powder form is more convenient, economical and more efficient than in the bar. Gold Dust, one of the first and the best examples of soap powder, can be used more economically than a soap, because the quantity desired can be measured out and so more used; with soap the whole cake or a portion of it must be put into the water, not only wasting more than is really needed, but also soaking the rest of the cake with water, which does not improve it. Indeed, some soaps lose much of their goodness by leaving the unused part of the cake in water.
Even if only the amount of soap desired is shaved off, some time is required for dissolving it, while Gold Dust dissolves immediately at the same time it dissolves the hard tallow and other salts, making the water as soft as rain water.

EAST HARDWICK

Despondent Woman Threw Herself in Front of Train; Was Rescued.
Hardwick came quite near adding another tragic death to its already long list recently, when a woman, who resides just out of the village, threw herself on the railroad track, refusing to move. Luckily, the train was not going at a high rate of speed and was stopped. She was dragged from the track. Her reason for the act was that she was "sick of life and wanted to die."
The skating on the ice is excellent.
Dr. Harvey was in Standard Saturday.
Mr. Durkin spent Friday night out of town.
Rev. Mr. Campbell was in Hardwick Saturday.
Elias Magoon, who has been ill for several weeks, is recovering.
A church meeting was held at the Baptist church Saturday afternoon.
Miss Vera Fort, who spent Saturday and Sunday here and in Hardwick, returned to her school in Elmore Monday morning.
Gladys Haseman had a narrow escape from a severe accident, when she slid into a barn last week. She cracked the bone in her nose, but considers herself quite fortunate to have escaped with only this injury.

FORESTS FOR UNCLE SAM.

Gifts to Enable the Government to Save Big Trees.

One of the most public spirited gifts ever made to the government came during the year from William Kent of Chicago, who has deeded to the United States 295 acres of primeval redwood forest on the southern slope of Mount Tamalpais, about six miles from the city of San Francisco. This grove is one of few remaining tracts of redwood forest to be found in its natural state in California. At the request of Mr. Kent it will be called the Muir woods, in honor of John Muir, the noted naturalist. The destruction of redwood by lumbering has been very rapid during the last decade. The large timber in the Muir woods has escaped the ax partly because of its location and partly because the former owners of the tract have protected it. Now that the gift has been accepted

should be 5 per cent of acetic acid, the barrels should be filled full and tightly corked. This will prevent other changes and will cause the vinegar to keep its strength. If one has considerable vinegar to make it would be well for him to secure the bulletin referred to.

Facts About the Potato.
An authority tells us that the potato has a large and unique relationship. Tobacco, tomatoes, eggplant and peppers belong to the same family. Probably that is why the potato bug is so often destructive to these crops. It is asked, "How can a potato grow other potato vines from the eyes since it is not a root, fruit or seed?" That is answered by way of illustration: A stem of almost any plant will produce another plant from the place where the leaves come out on it. If one will break off a piece of rosebush and plant it in a favorable place it will produce another rosebush, just as a potato will produce another vine.

In a wild state the potato vine is very hardy and will grow to a considerable height. It is said that the Indians did not cultivate the potato except for its leaves, which because known as their tobacco; hence the leaves and stalks of tobacco are large, but there are no signs of potatoes at the roots. So much for cultivation.

On account of the starch they contain, potatoes are valuable as food. The potato tuber
